

I do not support the NAB's petition 04-160. I live in a fairly rural area, and while there are a few (very few) local stations, one am and one fm. Neither does a very good job of weather reporting...and the distant stations I can receive with greater clarity are useless for local weather. Further, I do not believe it is the position of the federal government to intervene in the process of free enterprise. Let the market place fix itself....it has always done a pretty good job.
